## PROJECT

### • Asset Revamping Web Platform :

**Description:** Explorations, analyses and simulations of large assets operations: maintenance, inspection and revamping at a time when CapEx control, time to operate and asset availability are strategic performance drivers, the Andy3D Asset Revamping Web Platform is specifically designed to optimize vertical and linear assets revamping. By interactive mixing of extensive volume of data, between 3D models and laser scans, leveraging Capgemini's cutting edge Open Cascade 3D technology and web browser capabilities, our asset revamping platform enables easy life size simulations, reduces mistakes and improves cycles times

**Technologies:** Java, Spring Boot, Restful Web services, Maven ,ReactJS, PostgreSQL

### • Dairy Finance :

**Description:** The dairy farm sector is among the biggest industries in rural India, and individuals who wish to start and operate their own farms or make improvements to their existing farms can now make the most of dairy farm business loans. The reason for taking out a loan like this can be to establish small dairy units that have two to four mulch cattle, to collect, process, and distribute milk, to establish a new medium or large dairy unit, to manufacture milk products, to construct cattle shed, or to buy crossbreed or improved mulch cattle.

**Technologies:** JSP , Spring MVC, Hibernate ,Restful Web services, Maven
